TECHNICAL SKILLS

Languages: Go, Java, Python, C

Backend & Databases: PostgreSQL, MySQL, REST APIs

Tools & Systems: Docker, Git

EXPERIENCE

Data Engineer Intern

Apr 2025 – Sept 2025

Amasqis.ai — Remote

- Developed REST APIs using FastAPI for an Airbnb-style real estate platform, handling property listings, user management, and search functionality across multiple endpoints
- Integrated geospatial features enabling property owners to pin locations and users to search properties by geographic area using GIS-based mapping services
- Built data processing pipelines in Go to aggregate and transform real estate data for analytics dashboards and internal services

PROJECTS

RSS Feed Aggregation System (Go, PostgreSQL)

- Designed and built a Go-based RSS aggregation system with PostgreSQL persistence, enabling multiple users to register feeds, follow sources, and consume aggregated posts via a CLI interface.
- Modeled relational schemas for users, feeds, follow relationships, and posts, implementing paginated queries to efficiently handle growing feed data.
- Integrated external RSS sources with robust error handling for malformed feeds, network failures, and duplicate entries during ingestion.
- Structured the application with clear separation between CLI, business logic, and database layers to improve maintainability and extensibility.

Pokédex CLI — API-Driven Application (Go)

- Built CLI application consuming REST API with structured HTTP handling, JSON marshalling, and error propagation.

ACHIEVEMENTS

- 6th Place — Sol-VIT Hackathon (Business Optimization Challenge)
- LeetCode Contest Rating: 1750
- Oracle Cloud Infrastructure 2025 AI Foundations & Architect Associate Certifications

EDUCATION

VIT Bhopal University

Sept 2023 – Present

B.Tech in Computer Science and Engineering

CGPA: 8.47 (6th Semester)
